An interdisciplinary programme combining classical mechanical engineering with modern automation technologies...

Programme Features
- Mechanics Engineering:
  - Mechanics and Materials
  - Heat Transfer
  - Fluid Mechanics
  - Statics and Dynamics
- Automation:
  - Robotics & Mechatronics
  - Control Systems
  - Machine Intelligence
  - MEMs and Smart Materials
- Design and Manufacturing:
  - Computer Aided Design
  - Design Optimization
  - Material Processing
  - Manufacturing Automation

Career Prospects
- Mechanical engineers
- Production engineers
- Control engineers
- Design engineers
- Process engineers
- Systems managers
- Postgraduate studies
