New 2-year curriculum

Bimodal Bilingual Studies

The BA in Bimodal Bilingual Studies is a two-year, top-up degree programme having the goal of eventually creating a workforce in society that is competent in spoken and sign languages for professional support in education in different settings, information accessibility in social and professional contexts, social welfare of disadvantaged groups, and many other domains that call for such a unique combination of linguistic skills. The first of its kind in Hong Kong and Asia, this interdisciplinary programme focuses on the study of language science from the perspective of bimodality – auditory/oral and visual/spatial – and bilingualism/multilingualism, and examines how such language knowledge may become functional in a number of professional disciplines.

With further training, students from this programme will become effective educators, sign interpreters, social welfare and counselling workers, psychologists, speech and language therapists, NGO administrators or social entrepreneurs.

Undergraduate Admissions for Sub-degree Holders
(September 2019 Entry)
