DESIGNING ASSESSMENT FOR AN AGE OF ARTIFICIAL INTELLIGENCE

This presentation explores how assessment needs to change in the age of AI. It draws upon the presenter's work as one of the leaders of the significant Australian project *Assessment reform for a time of artificial intelligence*, which the Australian higher education regulator funded. The presentation's primary focus is resolving the tension between preparing students for a world permeated by AI and ensuring the integrity and security of assessment.

13 MAY 2024 (MONDAY) 12:30 - 13:45 (HKT) ONLINE VIA ZOOM
