

The Chinese University of Hong Kong
The Centre for Quality of Life
Results of the Quarterly Survey (December 2012) on Public Perception of the
Economic Conditions

The Centre for Quality of Life at The Chinese University of Hong Kong (CUHK) conducted a survey on the public perception of the economic conditions from December 27 to 29, 2012. A total of 502 Hong Kong residents aged 18 or above took part in the survey and answered questions about their family financial situation, their perception towards the business environment, the economic outlook, as well as their sentiment over consumption.

Table 1 presents the survey questions and results conducted in September 2012 and December 2012 respectively. It was revealed that 23% of the respondents said their families were financially “worse off” than a year ago, showed a decrease by 8 percentage points from the survey results in September 2012, while 16% said that they were “better off” than a year ago, went up by 1 percentage point. 58% said “the same”, increased by 5 percentage points compared with the September survey while 2% said they “don’t know or it’s difficult to tell”, increased by 1 percentage point.

On consumer confidence, 18% of the respondents thought it was a good time to buy major household goods, while 53% said the opposite and 29% said they “don’t know or it’s difficult to tell”. Comparing with the findings in September, those saying “yes” increased by 1 percentage point while those saying “no” decreased by 1 percentage point.

17% of the respondents believed they would be financially “worse off” in the coming year, decreased by 9 percentage points from the September survey. 18% believed their families would be “better off”, increased by 3 percentage points from the previous survey. Those believed that they would be “the same” accounted for 55% of the respondents, increased by 6 percentage points.

55% and 27% of the respondents expected the business environment of Hong Kong in the coming year would be “mediocre” and “bad” respectively. 10% of the respondents perceived the business environment would be “good” in the coming year. Comparing with the September survey, those saying “bad” decreased by 7 percentage points while those saying “good” remained the same with the September survey results.

25% of the respondents said they were “optimistic” and 31% found themselves “pessimistic” about the economic conditions of Hong Kong for the coming five years. Comparing with the results in September, those saying “optimistic” decreased by 1 percentage point while those saying “pessimistic” also dropped by 6 percentage points.

The survey also found that 29% of the respondents expected the employment situation would “deteriorate” in the coming year and 16% thought it would “improve”. Comparing with the September survey, those choosing “deteriorate” decreased by 3 percentage points and those choosing “improved” rose by 2 percentage points. 47% expected the employment situation would remain “unchanged”, increased by 1 percentage points compared with the September survey.

Indices of Consumer Confidence, Consumer Sentiment and Employment Confidence are reported in Table 2.

The Index of Consumer Confidence is compiled from the scores of questions number 3, 4 and 5. The higher the index, the stronger is people's confidence about economic conditions.

The Index of Consumer Sentiment is compiled from the scores of questions number 1 to 5. A higher index indicates people are more optimistic about the present situation and future development of economic conditions.

The Index of Employment Confidence is compiled from the score of the sixth question. A higher index shows a stronger confidence about employment situation.

For the first two indices, the baseline is January 2000 (index = 100). For the Index of Employment Confidence, the baseline is February 2000 (index = 100).

The Indices of Consumer Confidence and Consumer Sentiment in December 2012 were 79.6 and 84.5 respectively, went up by 6.2% and 6.4% from the September 2012 survey.

The Index of Employment Confidence was 75.9, increased by 4.1% from the previous result, indicating a positive outlook towards the employment market conditions among the residents.

Table 1

Survey questions		Answer	September 2012	December 2012	Change in percentage point(s)
問題一	與一年前比較，你和家人目前的財政狀況是變好、變壞或跟一年前一樣？	變好	15%	16%	+1
		變壞	31%	23%	-8
		跟一年前一樣	53%	58%	+5
		唔知道/好難講	1%	2%	+1
問題二	你認為現在是否購買主要家庭用品(如傢具、電視機、冰箱、煮食爐等)的好時機？	係	17%	18%	+1
		唔係	54%	53%	-1
		唔知道/好難講	29%	29%	不變
問題三	展望未來一年，你認為你和家人的財政狀況將會變好、變壞或跟現在一樣？	變好	15%	18%	+3
		變壞	26%	17%	-9
		跟現在一樣	49%	55%	+6
		唔知道/好難講	10%	11%	+1
問題四	展望未來一年，你認為香港的整體營商環境會好、差或一般？	好	10%	10%	不變
		差	34%	27%	-7
		一般	46%	55%	+9
		唔知道/好難講	10%	8%	-2
問題五	你對香港未來五年的整體經濟表現是樂觀、悲觀或跟現在一樣？	樂觀	26%	25%	-1
		悲觀	37%	31%	-6
		跟現在一樣	31%	34%	+3
		唔知道/好難講	6%	11%	+5
問題六	你認為香港未來一年失業情況會改善，惡化或跟現在一樣？	改善	14%	16%	+2
		惡化	32%	29%	-3
		跟現在一樣	46%	47%	+1
		唔知道/好難講	8%	9%	+1
