

## Table of Contents

0. Introduction .....	1-5
Chapter 1. A Brief Characterization of Korean Phonology	
1.1. The role of morpheme structure conditions and surface phonetic constraints .....	6-12
1.2. Syllable and phonological cycles .....	12-19
1.3. The major MSC's and SPC's in modern Korean ..	19-40
Chapter 2. MK Consonant Clusters and Obstruent Tensing	
2.1. The problems .....	41-45
2.2. Views on MK word-initial consonant clusters ..	45-51
2.3. The reality of MK consonant clusters .....	51-55
2.4. MK syllabic structure constraints and the development of tensing .....	55-63
2.5. Obstruent tensing in morpheme boundaries ....	63-68
Chapter 3. The Origin and Development of the Aspiration Contrast	
3.1. Sino-Korean morphemes .....	69-73
3.2. Aspiration in SK labial stops .....	73-84
3.3. The development of aspiration .....	84-87
3.4. Phonetic plausibility and the intrinsic nature of aspiration .....	87-92
3.5. Relative phonological strength .....	92-100
Chapter 4. Vowel Systems of Modern Dialects and MK	
4.1. Issues in modern Korean vowels .....	100-103
4.2. The synchronic status of i and palatalization .....	103-110
4.3. Dental palatalization and vowel fronting ..	110-115
4.4. Diphthongs and abstract vowels .....	115-120
4.5. Lexical representations and phonological rules .....	120-124
4.6. The front vowel series and vowel fronting ..	124-129
4.7. MK vowels .....	129-134
4.8. MK vowel harmony .....	135-142
4.9. MK syllabic structures and diphthongs .....	142-145
4.10. Vowel rotation and vowel harmony .....	145-151

## Chapter 5.

5.1.	Preliminaries .....	152-156
5.2.	MK data and problems in MK pitch .....	156-160
5.3.	MK accents and accent neutralization .....	160-167
5.4.	Progressive and regressive accent neutralization .....	167-172
5.5.	Phrasal pitch assignment .....	172-178
5.6.	Epenthetic vowels .....	178-182
5.7.	Pitch transposition and obstruent lenition .....	182-186
5.8.	A summary of the MK prosodic system .....	186-189
