

CHINESE SURNAMES AND THE GENETIC DIFFERENCES

Contents

	page
Introduction	1
1. Methodology: the use of surnames for the study of population structure	2
a) Distributions of the numbers of surnames.	2
b) Estimation of α and v .	6
c) Relationship between N_m (as used in genetics) and α (surname abundance).	8
d) Migration estimated from two surname censuses taken at different times.	8
2. History of Chinese surnames and sources of data for the present research.	10
3. Results from surname distributions.	13
a) Fit of distributions.	19
b) Estimates of surname abundance (α).	22
4. Trees and principal coordinate (PC) maps from surnames.	29
a) Trees.	29
b) Principal coordinates.	37
5. Subdivision of surnames according to frequency.	38
6. Isolation by distance.	42
7. Comparison with genetic data.	53
8. Prehistory and history.	57
9. Discussion and conclusions.	61
