

TABLE OF CONTENTS

Forward	i
Preamble	iii
The Use of Computers in Chinese Linguistics <i>William S-Y Wang</i>	
1. Introduction	
Issues and Topics in Chinese Natural Language Processing <i>Chu-Ren Huang and Keh-Jiann Chen</i>	1
2. Grammar and Parsing	
Information-based Case Grammar: A Unification-based Formalism for Parsing Chinese <i>Keh-Jiann Chen and Chu-Ren Huang</i>	23
Logic-based Parsing of Chinese <i>Hsin-Hsi Chen</i>	47
3. Interpretation	
A Cognitive Treatment of Aspect in Japanese to Chinese Machine Translation <i>June-Jie Kuo and Miao-Ling Hsieh</i>	77
Ambiguity Resolution of Serial Noun Constructions in Chinese Sentences <i>Ching-Long Yeh and Hsi-Jian Lee</i>	103
4. Characters, Words and Text (字, 詞, 與文獻)	
Determinative-measure Compounds in Mandarin Chinese: Formation Rules and Parser Implementation <i>Ruo-Ping Jean Mo, Yao-Jung Yang, Keh-Jiann Chen and Chu-Ren Huang</i>	123
Statistical Word Segmentation <i>Tung-Hui Chiang, Jing-Shin Chang, Ming-Yu Lin and Keh-Yih Su</i>	147

5.	Systems	
	A Mandarin Dictation Machine with Improved Chinese Language Modeling	175
	<i>Lee-Feng Chien, Keh-Jiann Chen and Lin-Shan Lee</i>	
	From Argumentative Discourse to Inference Trees: Using Syntactic Markers as Cues in Chinese Text Abstraction	199
	<i>Benjamin K Tsou, Hing-Lung Lin, Hing-Cheung Ho and Bong-Yeung Lai</i>	
	The Computational Models of the BehaviorTran English-Chinese Machine Translation System	223
	<i>Keh-Yih Su, Jing-Shin Chang, Jong-Nae Wang, Emma Chang and Ming-Wen Wu</i>	
6.	Chinese Abstracts 中文摘要	247
