

# Nature of Internships

## Chemistry-Related Industry

1. Fugro Technical Services Limited
2. Ling Nam Medicine Factory (H.K.) Limited
3. He-Ro Chemicals Limited

# Fugro Technical Services Limited

## Job Description:

- To assist general operation in the chemical laboratory
- Assist in preparing testing report  
(Construction Material Testing)

Number of Positions: 2 - 4

Preference of Student Background: Year 2 or 3

## Sharing from Student:

I was assigned to the water lab last summer. During the two months internship, I had a chance to perform an entire analytical test due to the long annual leave of a senior chemist. I was able to take part in various tests and some calibration work in the laboratory. Besides, sample handling and generation of test report were learnt. Some administrative works like communicating with clients, document control were also done. The colleagues there were nice and gave me a great care. In general, I have learnt a lot on the operation of testing lab during the period of internship. The company is located at Siu Lam, company coaches were offered to different places in N.T. or Kowloon for going and off work.

# Ling Nam Medicine Factory (H.K.) Limited

## Job Description:

### Quality Controller

- Perform QC routine testing
- Prepare GMP document

Number of Positions: 1

Preference of Student Background: Year 2 or 3

#### Sharing from Student:

I was working in the quality control department. We had to perform QC routine checking, prepare samples of different raw materials for analysis, check water quality, and prepare GMP documents.
