Suggestions for improvement?

Blackboard®

Accessible content is better content

Alternative Formats

Ally automatically generates these “Alternative Formats” for all your course files, and makes them available for download to you and your students. Your original file will not be affected by the alternative formats.

Ally Indicators

Ally integrates with your institution’s learning management system, and provides feedback within your course workflow. Log-in to your course site, and you will find the Ally indicators next to files or content. If you have no course files yet, upload one, and an indicator will appear next to the file name. Click the indicator to view your accessibility feedback. Follow along step-by-step to improve your original file.

Needs help!

A little better

Almost there

Perfect!
