TREE FELLING
&
PLANTING REPORT
(Year 2005)

May, 2006
Prepared by CDO & EMO
TREE FELLING & PLANTING REPORT (Year 2005)

TABLE OF CONTENTS

A. Introduction
B. Reasons for tree felling
C. Summary of tree felling
D. Summary of tree planting
E. Summary of tree transplanting
F. Post-planting observations with photo record
A. Introduction

In response to Administrative Affairs Committee requirements, the following report illustrates the trees felling and planting works in the year of 2005.

B. Reasons for tree felling

From maintenance point of view, routine tree inspection is one of the duties in the EMO Landscaping Section. The main objective is to check the health condition of trees as well as to plan tree pruning works for reducing collapse during strong wind or typhoon period. Crown thinning is to reduce wind resistance by trimming the unhealthy branches. To enhance tree character, regular tree pruning will be considered for trees located close to campus roads and heavy traffic grounds.

Trees would only be felled on the following conditions:

Condition “A”
- Trees suffer serious health problem with a low chance of recovery even taken remedial measures
- Poor shoot growth and die-back in the crown
- Cavities or internal rotting are revealed by discolored bark, moisture seeping through the bark or bracket fungi
- Natural dead (end of life-span)
- Natural disaster

Condition “B”
For development and slope projects, trees within the identified site area or in close proximity to the site boundary (generally within 5 – 6m distance) where building footprint cannot be adjusted will be subject to felling or transplanting.

Trees within temporary works area are to be retained with necessary protection unless they are considered causing seriously obstruction to the construction works.
Summary of tree felling

Total 179 trees were felled in 2005 as listed below:

D. Summary of tree planting

Total 728 trees were planted in 2005, 520 of them in seedling size. Most are evergreen trees. Some are of flowering species having dense green foliage for shade such as Delonix regia, Lagerstroemia speciosa and Bauhinia blakeana.

</table>
F. Post-planting observation

Most of the trees grow quite well except a small no. on the slopes. Choosing right planting season, pre-planting preparation and post-planting maintenance are equally important for long term tree establishment.

Attached photos in Appendix “A” illustrate some of the trees planted.
Roystonea regia planted near by K.C.R.C

Delonix regia & Ficus benjamina planted near the newlyformed Piazza
Ficus benjamina planted to the both sides of the road  

Taxodium distichum planted along the water front
Bauhinia blakeana planted in Madam S.H. Hall courtyard

Cinnamomum buramanni planted along the Alumni Trail
Native seedling planted onto the slope in Alumni Trail

Native seedling planted onto the slope in Alumni Trail
Phoenix roebelenii together with shrubs to enhance space of Chan Kwan Tung Inter-University Hall

Prunus persica planted onto the lawn of Estates & Maintenance Building
Fragrant plant - Michelia abla to define the entrance of newly formed car park in United College campus

Lagerstroemia indica planted in entrance of newly formed Piazza
In -filled 1 no. of Grevillea robusta to match with the existing ones

A row of Plumeria rubra planted in front of new constructed seat
Ficus altissima planted next to the pavilion in U. C. Piazza

A row of Heteropanax fragrans planted in front of Wu Chung Multimedia Library
Juniperus chinensis “Kaizuca” planted next to the U. C. Bus Stop

Roof garden of Chan Chun Ha Hostel
Liquidambar formosana planted in front of Satellite Station

A row of Bauhinia blakeana planted along the slope toe in Shaw campus
Litsea glutinoa & Mallotus paniculatus planted near Chung Chi College Staff Quarters A, B and C

Bauhinia variegata planted along the slope below Chiang Building
Bauhinia blakeana planted in slope adjacent to Theology Building

Ficus microcarpa planted in slope adjacent to Theology Building
